

CCC 1 year old Toddler Program
(12 months -24 months)

Our 1 year old program features an emergent curriculum that is planned around the current interests of the children enrolled while enticing them towards the next milestone and facilitates learning to foster brain development.

Through hands on activities the kids learn to take turns (sharing), they are encouraged to use their words and their bodies to communicate, daily we sing silly songs & finger play rhymes which light up their brain & encourages the use of more words.

We offer fine and large motor activities through facilitated play both inside and outside, teaching them how to play and aiding them in becoming aware of what they are feeling and how to express it in acceptable ways.

Our class time activities include touching and feeling of objects, painting and learning about our world. Bible stories are brought to life for our little tots in circle time by visits from puppet friends and colorful pictures & books.

Our staff use positive discipline techniques to help guide and teach the kids how to interact in social settings. Young ones are welcomed into our loving classroom by our warm and caring staff.
