

## **School Age Program**

Our School age program balances opportunities to have active play both indoors and outdoors on either the playground or our large field on the back of our property; along with time to work on homework or rest and do quiet activities after a long day at school.

Daily activities/crafts coupled with group games and morning devotions, opportunities to read or color along with board games and open discussions about life offer our school age kids opportunities to give back to our center & community, staff and teachers and pour into themselves and ponder life and the type of person they want to be.

This age group thrives on forming lasting friendships and developing a sense of independence as they navigate their years in elementary school. Our center hopes that by the environment we provide, the discussions we have and the bond the teachers form with the kids that each child will know they are valuable and seen, needed and come to a personal relationship with Jesus!

# School kid daily Schedule
